- Lessons learned
The BIG Fix

The California Asphalt Pavement Association:

- Founded in 1953
- Non-profit 501(c)6 Trade Association
- 180 member companies
- Asphalt producers, refiners, paving contractors, binder suppliers, engineering firms, equipment manufacturers & others
- Statewide voice for the asphalt pavement industry in California
Nationally, and in California, asphalt covers about 95 percent of paved surfaces.

Asphalt is 100 percent recyclable & is the most recycled product worldwide.

Smooth, quiet, safe, durable and a good value.

Asphalt pavements continue to evolve, with new research, technology and techniques.

Local
The BIG Fix

FEDERAL Funding:

The Looming Crisis

Source: National Asphalt Pavement Association
“Self-Help” Counties (LOCAL):
- 25 of 58 California Counties
- Have passed sales-tax increases devoted to transportation
- 2/3 “super majority” required for passage per the California Constitution
- Counties cover more than 34 million residents
- $194 billion over the next 30-40 years
The **BIG Fix**

- **STATE** funding:
  - Last state gas tax increase: 1991
  - Lost 50 percent of buying power
  - Loan transfers during ‘Great Recession’
  - $171 BILLION in unmet needs statewide
The **BIG Fix**
The **BIG Fix**
1909 the California Legislature passed the first state highway bond, approved by voters in 1910 (Proposition 2) for $18 million for the construction of a state highway system.

The first fuel tax (2 cents per gallon) was created in 1923.
The **BIG Fix**

- Proposition 111 (1990) gas tax increase (5 cents per gallon increase in 1990, and 1 penny per year in each of the next four years).
- Prop. 2 (1998) allowed for loans to be made to the General Fund from the transportation fund.
- Prop. 42 (2002) Constitutional amendment on allocation of gas tax revenues for transportation
The **BIG Fix**

**Prop. 1B:**
- Approved by voters on the November 2006 ballot
- Authorized California to sell $19.925 billion in general obligation bonds to fund transportation projects “to relieve congestion, improve the movement of goods, improve air quality and enhance the safety and security of the transportation system.”

70 percent of California’s major roads are in poor or mediocre condition.

Driving on roads in need of repair costs California motorists $22.6 BILLION a year in extra vehicle repairs and operating costs -- $882 per motorist.

Six percent of California’s bridges are structurally deficient, meaning there is significant deterioration.
85 percent of California’s urban interstates experience congestion during peak hours. Traffic costs American motorists $170 Billion a year in wasted time and fuel costs.

Vehicle travel on California’s highways increased by 12 percent from 2000 to 2017.
TIP:

- Recruit others to help tell your story
43 percent of Arizona’s major roads are in poor or mediocre condition. Driving on roads in need of repair costs Arizona motorists $2.9 billion a year in extra vehicle repairs and operating costs -- $577 per motorist.

Vehicle travel on Arizona’s highways increased by 32 percent from 2000 to 2017.
69 percent of the $331 billion worth of commodities shipped to and from sites in Arizona is transported by trucks on the state’s highways. An additional 18 percent is delivered by parcel, U.S. Postal Service or courier, which use multiple modes, including highways.
KEY FACTS ABOUT ARIZONA’S SURFACE TRANSPORTATION SYSTEM AND FEDERAL FUNDING
May 2019

Roads and highways are the backbone of the U.S. transportation system, allowing Americans to travel more than two trillion miles annually. But, conditions on the system are deteriorating, as the need for transportation improvements far outpaces the amount of state and federal funding available. Making needed improvements to roads, bridges and public transit could stimulate long-term economic growth as a result of enhanced mobility and access.

Federal funding for surface transportation is provided through the five-year, $305 billion Fixing America’s Surface Transportation Act (FAST Act), which expires in 2020. Funding provided by the FAST Act falls short of the level needed to improve conditions and meet the nation’s mobility needs, and does not provide an adequate, sustainable, long-term source of revenue for the federal Highway Trust Fund. At a time when growing passenger vehicle and commercial truck traffic is increasing wear and tear and traffic congestion on the nation’s roadways, the balance in the federal Highway Trust Fund is decreasing. According to the Congressional Budget Office, the Highway Trust Fund’s current $33 billion balance is projected to decrease to a $12 billion deficit in 2022, because current spending levels exceed revenues from taxes on motor fuels, heavy trucks and tires.

Federal Funding for Our Nation’s Surface Transportation System Generates Jobs; Making Needed Highway Improvements Assures Economic Recovery and Growth

- Enhancing critical transportation assets will boost the economy in the short-term by creating jobs in construction and related fields. In the long-term these improvements will enhance economic competitiveness and improve the quality of life for the state’s residents and visitors by reducing travel delays and transportation costs, improving access and mobility, improving safety, and stimulating sustained job growth.

- The 2015 AASHTO Transportation Bottom Line Report found that annual investment in the nation’s roads, highways and bridges needs to increase from $88 billion to $120 billion and from $17 billion to $43 billion in the nation’s public transit systems, to improve conditions and meet the nation’s mobility needs. The report also found that the current backlog in needed road, highway and bridge improvements is $740 billion.

- Highway accessibility was ranked the number one site selection factor in a 2017 survey of corporate executives by Area Development Magazine. Labor costs and the availability of skilled labor, which are both impacted by a site’s level of accessibility, were rated second and third, respectively.

- Sixty-nine percent of the $331 billion worth of commodities shipped to and from sites in Arizona is transported by trucks on the state’s highways. An additional 18 percent is delivered by parcel, U.S. Postal Service or courier, which use multiple modes, including highways.

The BIG Fix

SB 1: Debunking the Myths

The Road Repair and Accountability Act of 2017 (SB 1) is a long-term transportation solution that will provide new revenues for road safety improvements, fill potholes and repair local streets, highways, and bridges. SB 1 will provide transportation investments in every community, improving the quality of life for all Californians. SB 1 includes strict accountability provisions to reduce waste and bureaucracy and dedicates all funds to transportation improvements. Opponents of SB 1 are spreading false information and flat-out untruths full of potholes.

We want to cement the facts.

1. MYTH— Practically none of the SB 1 funds will be used to fix our roads.

**FACT**

SB 1 invests more than $5 billion annually directly for maintenance, repair, and safety improvements on state highways, local streets and roads, and bridges. SB 1 also provides investments in mass transit to help relieve congestion. In total, SB 1 will provide:

- $1.5 billion for the State Highway Operations and Protection Program
- $1.5 billion for local streets and roads
- $400 million for bridge maintenance and repairs
- $300 million for goods movement and freight projects
- $275 million for congested corridors and relief management
- $200 million for the Local Partnership Program to match locally generated transportation funds
- $100 million for the Active Transportation Program to improve safety and expand access on streets, roads and highways for bicyclists and pedestrians.
- $750 million for mass transit

2. MYTH— SB 1 will cost California families upwards of $700 a year

**FACT**

The California Department of Finance calculated that the average cost to motorists is roughly $10/month. Here’s the math:

- Registration: Nearly 50% of all registered vehicles in California are valued at less than $5,000. Forty percent are valued at less than $25,000. Thus, the average annual amount for vehicle registration is approximately $48.

ALL OPPPOSE PROP 6

“Prop 6’s passage will lead to a billion-dollar down payment on the failure of our roads and bridges to meet the needs of our state.”

Mark Gordon
President, California 100
Foundation

“Caltrans has shown that they can’t keep up with their current funding mechanism.”

Dr. David West
Director of Transportation
University of California, Santa Barbara

Central Coast Public Safety Leaders Urge No on Prop 6

Prop 6 threatens public safety in the Central Coast

Prop 6 is opposed by the California Association of Highway Patrolmen and the California Professional Firefighters because it puts public safety at risk by eliminating transportation funds dedicated to our region. Voters passed Prop 90 in 2006, prohibiting politicians from diverting these funds and dedicating them to fixing local roads and bridges.

Current Central Coast Projects AT RISK

x 147 bridge and road safety projects
x 225 projects fixing crumbling roads and potholes
x $1.1 billion in existing funding dedicated to the Central Coast

Protect critical funding for bridges and road safety in the Central Coast.

VOTE-BY-MAIL NO ON 6

Vote NO to the Proposition 6

Prop 6 attacks bridge and road safety

The California Professional Firefighters and the California Association of Highway Patrolmen strongly oppose Prop 6, which endangers our local roads, highways, and bridges and the communities they serve.

Prop 6 is a hidden tax on drivers, passengers, and taxpayers.

Permits $2 billion in annual fees dedicated to fixing crumbling roads, freeways, bridges, and tunnels.

If Prop 6 is approved, over $5 billion will be diverted from bridge and road safety improvement.

Caltrans has shown that they cannot maintain our transportation infrastructure.
